

This image shows a vertical strip of a document page, heavily degraded and noisy. The left side features a dark, textured band, possibly representing a binding or a heavily shadowed edge. The right side is a lighter, speckled band, likely representing the main body of the page. The overall appearance is that of a low-quality scan or a heavily damaged document fragment.

A black and white photograph showing a dense, dark, textured surface, likely a wall or a thicket of vegetation, with a light-colored, possibly stone or concrete, surface visible on the right side. The dark area is filled with intricate patterns of leaves and branches, creating a complex, almost abstract texture. The light area is smoother and more uniform in color.
